

VitalSigns[®]

Taking the pulse of our community

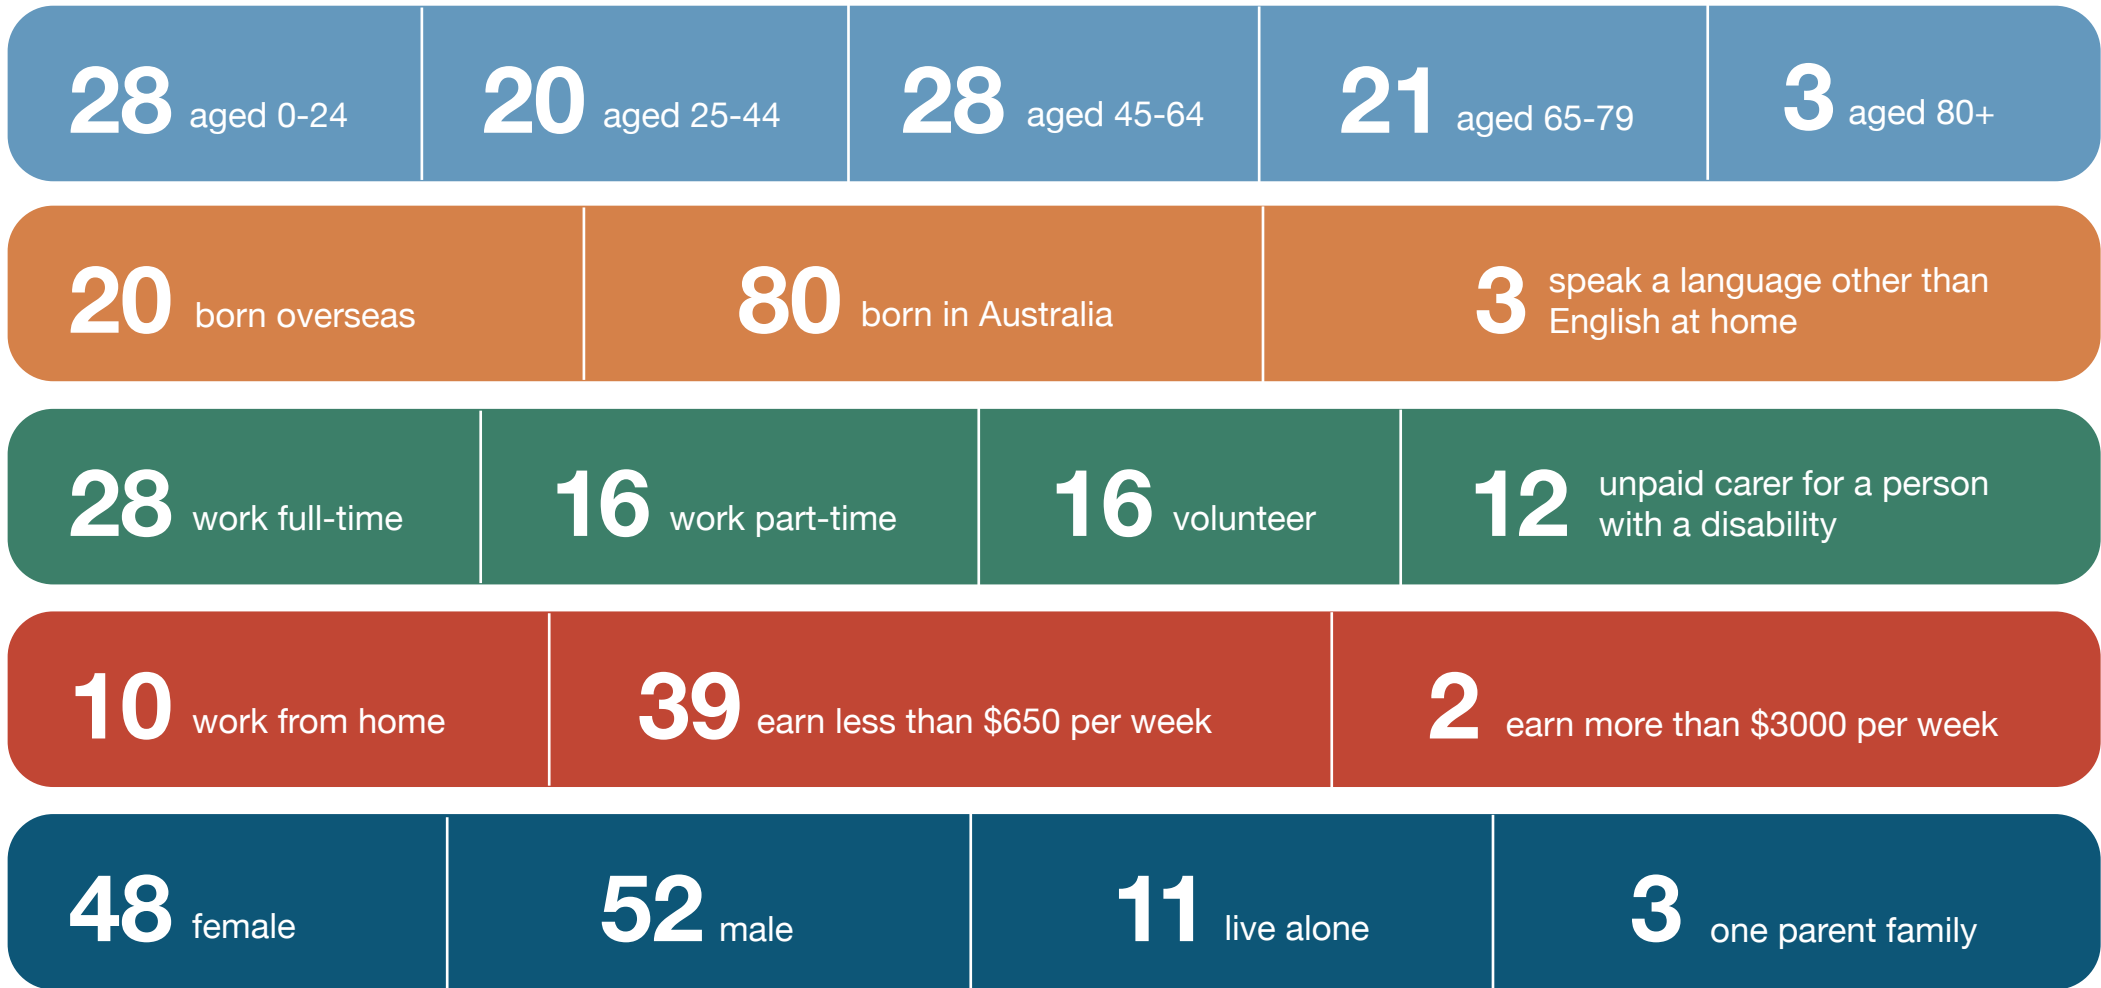

Thorpdale 2025 Report on Gunaikurnai Country

Welcome to Thorpdale's second Vital Signs Report. This provides another snapshot, five years on, of how our community is faring in key quality of life areas: Health & Wellbeing, Education & Learning, Economy, Environment and Belonging. This Report reflects some of the changes brought about by the Covid pandemic.

Using credible data combined with people's lived experiences, the goal of this report is to build a better understanding of challenges and opportunities in Thorpdale and its surrounding communities. This understanding is vital to making our community a better place for everyone, now and forever.

We acknowledge the Gunaikurnai people, and we pay our respects to Elders past and present, whose knowledge and wisdom have ensured the continuation of culture and traditional practices, shaping and caring for this precious land and ensuring its abundance. We aim to work respectfully with all people and to encourage a lighter footprint on the land, to ensure that it remains environmentally, economically, and aesthetically sustainable.

If Thorpdale was a village of 100 people

Current statistical data does not allow for non-binary identification

What you love about where you live

- "Fresh air, helpful, friendly people who have time to stop and talk and help out. Informative community newspaper. The way people band together to support local events, etc."
- "I love the strong sense of community"
- "Our fight, drive and ability to work together to get things done. Also the space, freedom and atmosphere."

HEALTH & WELLBEING

Without good physical and mental health, we cannot thrive as individuals or as a community.

The data highlights that access to health services, mental health and family violence remain vital issues for our community and it gives a snapshot of our health behaviours. Our mental health has been further impacted by Covid and localised natural disasters.

Access

There continues to be more GPs per head of the population in Baw Baw in comparison to Victoria, and the number of psychologists has increased by 22% between 2018 and 2024. Since Covid, increasing Telehealth appointments has assisted in ensuring easier access to a range of health professionals.

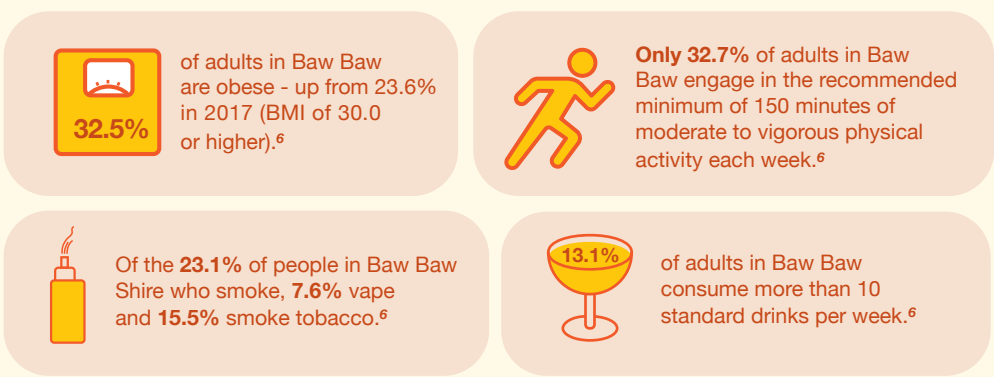

Mental Health

If you, or anyone you know needs support:
Beyond Blue **1300 224 636**. Lifeline **13 11 14**.
Kids Helpline **1800 55 1800**.

‘Stormbirds Program’ helps recovery at local schools

The Stormbirds program has supported small groups of students to work through the impacts of change wrought by the 2024 storm. Five educators were trained in this evidence-based program which works to create a safe space for the students to recognise feelings, develop coping skills and resilience, and to practice new ways of thinking and responding to uncertainty brought about by natural disasters.

One of the five educators trained was Sarah Linton, teacher and welfare coordinator at the Mirboo North Primary School. She explained:

“The theme throughout the four weeks is that change is the one constant that happens in our life. The only thing we can rely on is that change will always be in our life. Sometimes you think it has been a long time and [that the storm] isn’t still impacting the kids, but what they remember and the thoughts that come out are really interesting.”

Sarah noted that two of the things common to most experiences were the sound of chainsaws, and that students felt that they were being listened to.”

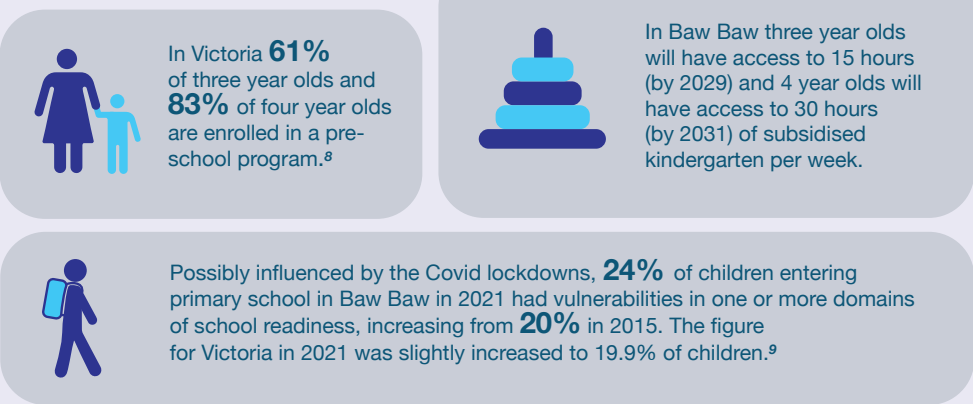

EDUCATION & LEARNING

Access to Education is vital to health and wellbeing and empowers children and adults.

The data shows that not as many of our young people go on to further education compared to the Victorian average, but those who do have better employment outcomes. The data also shows that we have a strong uptake of apprenticeships and traineeships.

Early Learning

Access to high-quality preschool programs is a proven strategy for lifting outcomes for all children.

Educational Attainment & Pathways

The Census gives a snapshot of educational attainment in our community, which reflects our socioeconomic make up.¹⁰

A snapshot of the post-school destinations of those who completed school in Baw Baw in 2023.¹¹

In Australia employment outcomes are strongly linked to education.¹²

Lifelong Learning

Supporting transition to further education

Students of any age from the Mirboo North district can apply for an Education Support Award to assist with the financial costs of transitioning into tertiary level studies.

“The costs faced by local students seeking to further their studies through TAFE or University are significant. These include fees, materials,

laptops, also rent and accommodation bonds for those moving away from home. Before you even go to the first lecture, you can be up for \$10,000,” explained Diana Mueller, Director of the Mirboo North & District Community Foundation. “The Education Support Program is targeted at giving students the capacity to meet these costs.”

“Feedback tells us that financial support over two years has been really important for students, as often financial support dries up in the second year of studies, yet their costs of living continue to rise,” explains Anne Marie Dieperink, Executive Officer of the Community Bank, Mirboo North & District.

ECONOMY

Economic viability and sustainability are vitally important for building strong rural communities.

While our unemployment rate remains low, our labour force participation rate has declined and there is a shortage of labour. The Health & Social Assistance sector provides the most jobs in Baw Baw, with Agriculture sector coming in at third.

Thorpdale Community Snapshot

Where we work ¹³

Agriculture, Forestry & Fishing	31.8%
Health Care & Social Assistance	10.6%
Transport, Postage & Warehousing	7.8%
Construction	6.9%
Retail Trade	6%

How we work ¹³

40+hours	40.6%
35-39 hours	20.3%
25-34 hours	7.1%
16-24 hours	11.3%
1-15 hours	10.8%
0 hours	5.2%

Employment

Labour shortage is a feature of the post-pandemic environment. Regional areas have seen a **136.3% increase** in online job advertisements from 2020 to 2025.

While vacancy numbers have decreased, there are still **25% more** job advertisements currently in Australia than in 2019.¹⁴

Gippsland's unemployment rate has fallen since 2020 and is slightly lower than the state unemployment rate. However, Gippsland's youth unemployment rate is higher (**14.8%**) than Victoria's (**10.6%**).¹⁶

Participation

As of 2025, **59%** of people 15 years of age and over living in Gippsland were participating in the labour force. That is, they were employed in jobs or unemployed and looking for work.¹⁵

40.4% were not in the labour force, and may be undertaking other activities such as studying, retirement, caring for children, or may be unable to work.¹⁵

Gippsland's labour participation rate is lower than Victoria's

Industry

The Baw Baw economy supports 20,670 jobs. **19.6%** of the jobs in Baw Baw are in the Health Care & Social Assistance sector with Agriculture, Forestry and Fishing coming in a close third at **11.5%**¹⁷

The largest contributors to Baw Baw's gross revenue are the Construction sector (**\$1.5 billion**), the Manufacturing sector (**\$1.1 billion**) and Agriculture, Forestry and Fishing (\$1.1 billion).¹⁷

Energy resilience for local small businesses

In 2024 local business and community development organisation, Mirboo Country Development Inc (MCDI) was successful in receiving a grant of \$146,000 in support of energy resilience for local small businesses from Ausnet's Energy Resilience Community Fund.

"Energy resilience was a big concern for local small businesses after the February 2024 Storm knocked out power to the town for days. This prolonged power outage caused significant stock losses for food businesses and others simply couldn't operate, threatening their viability." explained Kelly McCarthy, President of MCDI.

The grant has funded an electrical assessment for these businesses, the upgrade of necessary circuits and electrical infrastructure, then the install of changeover switches to enable connection to generator power.

This infrastructure will benefit not only the business owners but will also benefit the wider community by enabling access to goods and services during an emergency.

ENVIRONMENT

Our environment is vital to our health, quality of life and survival.

The natural environment is one of the reasons we love where we live. Maintaining our region's biodiversity and managing the impact of climate change is an increasing imperative and a priority for our community.

Biodiversity

Thorpdale is located in the Strzelecki Ranges Bioregion which is one of the most cleared bioregions in Australia. Changes to the native habitat as a result of human and natural activity have put many of our unique species at risk.

The storm that hit the Mirboo North area in February 2024 resulted in **50% of canopy loss across 95 hectares and 30%-50% canopy loss across another 62 hectares.**¹⁸

Native forest logging ended in January 2024 in this region and across Victoria.

Preserve Our Forests members discovered a viable population of **35** Greater Gliders, a species listed as 'threatened to extinction' in Victoria.

Energy and Waste

Electricity generation in Australia 2023/24

The proportion of electricity generated by renewables increased to **35%** in the 12 months to June 2024¹⁹, up from **19.7%** in 2018-19.²⁰ These figures includes all electricity generated outside of the electricity sector, including by industry and households.

46% Coal¹⁹
Down from 58.5% in 2019.²⁰

17.2% Gas
In Victoria this is less than 5%.¹⁹

1.7% Oil¹⁹
Down from 2.1% in 2019.²⁰

18.3% Solar¹⁹
Up from 6% in 2019. ²⁰

5% Hydro¹⁹

11.6% Wind¹⁹
Up from 6.7% in 2019 ²⁰

Thorpdale's uptake of rooftop solar has increased to **32.8%** from **23%** in 2020.²¹

Waste
Baw Baw's recyclables and organic kerbside diversion rate was **56%** in 2020. Current analysis shows **53%** of waste found in the general rubbish bin is food, garden or recyclable. From July 2026 Baw Baw residents with a kerbside waste collection will have access to a Food and Organics service to increase waste diversion.²²

Climate Change

Climate change is the most significant environmental challenge facing us. As an agricultural region, our economy and our farmers are particularly vulnerable to its impact.

More days over 35 degrees.

Less annual rainfall, but more intense rainfall events.

More days with high and extreme fire danger.

More extreme weather events (bushfires, droughts, floods & storms).

Decreased water flow in rivers and wetlands.

Increased weed and pest distribution.

Biodiversity improvement through habitat protection

As noted in our last report, Preserve our Forests, a local environmental group was successful in spearheading a community effort to prevent plans to log three native forest coupes on the edge of Mirboo North, when it secured a designation of 'Immediate Protection Area' for this threatened forest.

Preserve our Forests have continued their advocacy over the last five years to ensure that this protection would be ongoing and were delighted when it was announced in September 2025 that this important piece of forest has finally been protected as a Conservation Park through Victorian state legislation.

"This could not have happened without the continued support of our community to protect this 'refugia essential' to our native species, an abundance of orchids and other beautiful native flora," says Marg Thomas from Preserve our Forests. "Securing the habitat in this native forest became even more significant after the huge tree loss caused by the 2024 supercell storm. We look forward to making this new Conservation Park more accessible to locals and visitors alike."

BELONGING

Participation and our connections in the community help to develop a sense of belonging, which is vital to building healthy, inclusive communities.

Belonging continues to be a strength across our district. Volunteering has reduced since the Covid, putting pressure on local community organisations, but volunteering rates are still higher than the Victorian State average.

Social Cohesion

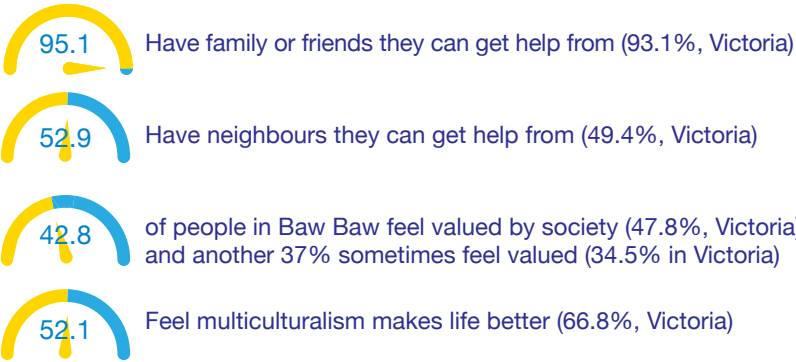

The Scanlon Foundation produces the Mapping Social Cohesion Survey and Report annually.

Reports indicate that social cohesion in Australia increased during Covid, and then declined. The 2024 Report shows that social cohesion has been stable from 2023, but is below long-term average. ²³

The Scanlon Index of Social Cohesion, 2019-2024

Baw Baw is ahead of Victoria in some measures of social cohesion, including connection and social support, but Victoria is ahead in tolerance of diversity. ²⁴

Volunteering

Volunteering promotes personal community wellbeing through building connections and bringing community projects to life

Volunteering rates dropped significantly in Baw Baw over Covid: in 2021 it was **16.5%**. However, the rate is still higher than the Victorian volunteering rate of **13.4%**.²⁵

Significant levels of volunteering were evident locally after the February 2024 storm.

Social Isolation

Social isolation can arise from physical isolation, lack of public transport, poor mental health or lack of connection with the community.

25.6% of Baw Baw residents report they are lonely (compared to 23.7% Victoria) ²⁴

25% of people over the age of 75 in Baw Baw live on their own. **69%** of those people are female.²⁵

Thorpdale Potato Festival supporting community

The Thorpdale Potato Festival is held every two years in celebration of the humble spud and the potato growing practises used in the red volcanic soils of Gippsland. Entirely run by local volunteers, this festival not only provides a family friendly day out, it also showcases the town's agricultural heritage.

Even better, this volunteer run event not only brings joy, connection and learning, all of its profits go back into the community, supporting valuable locally led community projects.

"Proceeds from the Thorpdale Potato Festival are reinvested into the local community through a grants program that supports a variety of projects, fostering the town's growth and development," explains Meagan. "Every second year we are able to support local schools, community groups, sports clubs, and environmental initiatives to the tune of \$50,000 and more."

Why did we produce this report?

The Mirboo North & District Community Foundation and the Community Bank, Mirboo North & District are proud to present you with the second Vital Signs report for our region. This is yet another major collaborative project of both organisations who have a shared vision to foster strength and prosperity for the communities in our District.

We are hoping that this report will lead to a shared understanding of the challenges and opportunities before us as a community. This report is merely a starting point from which further discussion will enable us to target our community's resources to those areas.

How to use this report

This report is to get you thinking and chatting with your friends, family and work colleagues. Discuss questions like:

- What issues do you care about?
- What data surprises you?
- What would you do to make a difference?
- Will this data change the focus of your community organisation?

How can you get involved?

Tell us what you or your community organisation thinks. How should we make the most of our opportunities or tackle our challenges?

Offer your time and expertise to tackle initiatives that improve our community outcomes.

About the Mirboo North & District Community Foundation

The Community Foundation's mission is to build stronger communities through:

- Granting: over \$2 million in grants since 2010;
- Donations received: \$2 million since 2010;
- Investing: in Mirboo North Medical Centre facility leased to local medical practice;
- Facilitating: in knowledge and community solutions, through projects like this Vital Signs Report.

Together we Thrive.

Ruth Rogan, Mirboo North & District Community Foundation

About the Community Bank, Mirboo North & District

The Community Bank is a locally owned business that operates a "profit for purpose" model. Our banking profits are returned to our local community through sponsorships, grants and donations. We have returned \$2.7million in community contributions since opening in 2010.

When you choose to bank with us, you're not just opening an account, you are backing a model that reinvests in our community's wellbeing and development. This is banking that supports our clubs, funds scholarships, and helps local businesses grow.

If you want your banking to make a difference where it matters most, keep your banking local and help build a brighter future for our community.

Anne Marie Dieperink, Community Bank, Mirboo North & District

UN Sustainable Development Goals

The United Nations (UN) Sustainable Development Goals (SDGs) are a set of 17 global goals adopted by all UN member states in 2015 to achieve peace and prosperity for people and the planet by 2030. These goals serve as a blueprint to end poverty, protect the environment, promote wellbeing, and ensure sustainable development across the globe. There is an intersection between the UN Sustainable Development Goals and what the data and our experiences tell us about life in our district. We highlight this intersection through the inclusion of the relevant SDG icon in each domain.

Our District

This Vital Signs collaboration covers the following district: the main towns of Mirboo North, Boolarra, Yinnar and Thorpdale, as well as the smaller towns and communities in-between including Mirboo, Mardan, Dumbalk, Hallston, Allambee, Childers, Narracan, Delburn, Budgerey, Yinnar South, Jumbuk and Boolarra South.

The population of this district is approx. 8,700 and is part of three different Local Government Areas: Latrobe, Baw Baw and South Gippsland.

For this reason this collaboration has produced four Vital Signs reports: one for each of Mirboo North, Yinnar, Boolarra and Thorpdale, which reflects their own local data and the data of their Local Government Area.

A word about the data

While we have endeavoured to use local data wherever possible, much of the data used in this report is only available at a Local Government Authority (LGA) or larger population level. Data relating to Thorpdale in this report, generally encompasses the town and surrounding communities.

Vital Signs is a community check-up conducted by community foundations around the world that measures the vitality of our communities and identifies significant trends in a range of areas critical to quality of life. With special thanks to the Toronto Foundation for developing and sharing the Vital Signs concept. Community Foundations Australia manages the licensing of Vital Signs within Australia.
